Hi Professor,

I'm writing this in hopes that you could allow me a few days extra to work on the second assignment, ideally about 2-3 days. I know there were a few announcements about this but I do not want to take the risk of just assuming my reason is considered valid enough.

The reason for me asking is that I recently got a prescription (attached) to get glasses, but it took longer than expected to arrive. While my power isn't that high, the long-sightedness makes it hard to focus on things up close (like my laptop or phone), and combined with my astigmatism making things a little blurry, my eyes tire (making everything very blurry) and sometimes hurt after prolonged periods in front of the screen.

My glasses took about 1.5 weeks to arrive but I think I should be able to finish up my assignment properly if given the extra 3 days. I really hope you would consider allowing me the extension. Thank you!

Regards,  
Chan Jie
